

The Mountbatten Learning System and the MBMimic iOS Application

The MBMimic is a communication app that supports the production of hard copy Braille output and interaction with a Braille user. The app can be operated by the sighted as well as by the blind. It is fully accessible when VoiceOver is running on your iOS device.

With the MBMimic you can:

1. Create a list of users (e.g. students)
2. Assign folders with specific content to each student
3. Transfer files among your students
4. Transfer files from apps like Documents to MBMimic
5. Retrieve files from your students' Mountbatten
6. Read files stored in your students' Mountbatten
7. Send files to your students' Mountbatten
8. Email files retrieved from the Mountbatten
9. Emboss files stored in your iOS device
10. Chat with the Mountbatten user using the Chat application
11. Help your students learn to spell words using the Whiteboard application
12. Check if your student can read contracted or uncontracted Braille

The Whiteboard

When you tap on the Whiteboard application a new screen opens with an edit area and a screen keyboard. Every word you type will get embossed after the space bar is pressed on the screen keyboard. Similarly, every word gets brailled on the Mountbatten will be displayed on the screen once the Mountbatten user presses the space key on the Brailler.

The Chat

When you open the chat program, you will see a large white field, an edit box, and the screen keyboard. The text is entered into the edit box but it will not be embossed until the Enter key or the OK button is tapped. When the Mountbatten user is brailling their entry, text will be displayed only after the New Line key is pressed on the Brailler.

The home screen displays the following options:

CHAT –

an application for chatting between the Mountbatten user and the iOS user.

WHITEBOARD –

an application for various writing activities between the Mountbatten user and the iOS user

CONNECTION STATUS –

shows whether you have successfully connected to a Mountbatten

FILES –

this option shows how many files are stored in Mountbatten memory; the Show button allows you to open the Mountbatten directory listing the files stored in its memory

LANGUAGE –

this option informs you about the default language

BRILLE TABLE –

this option informs you about the default Braille Table

MODE –

this options shows you which mode the Mountbatten is currently in; it can be either Learn or Advanced

FIRMWARE –

this option provides information about the firmware version

MODEL –

this option shows the model version of your Mountbatten

SERIAL NO -

this option provides the serial number of your Mountbatten

New Mountbatten Learning Systems now include the built- in Bluetooth Smart option to connect to Bluetooth Smart Ready devices, such as the iPad Mini, iPad 3 and 4th generation and iPhones 4s or greater.

MBMimic App is FREE and available from the Apple iStore

A Mountbatten Bluetooth module can easily be connected to the back of existing Mountbatten Learning Systems. It is not available for the Mountbatten Writer. Call for pricing!
