

What Can You Do With A CCTV?

CCTV - Closed Circuit TV Magnifier

A CCTV

Is a video magnifier designed to empower people with macular degeneration, inoperable cataracts, diabetic retinopathy or other conditions that can steal their visual acuity and independence.

Is an electronic magnifier that helps some people with limited vision perform daily living tasks and retain or regain independence.

CCTVs are so versatile that people find new uses for them every day.

CCTVs are easy to use and are appropriate in many settings including libraries, schools, businesses and homes.

A CCTV may help someone:

- Read newsprint, handwritten letters, invoices, coupons, Medicare statements, bank statements, product ingredients, or recipes.
- Write checks or balance a checkbook
- Read prescription labels or product warnings
- Read product assembly instructions, warranties or manuals.
- View photographs, blueprints or maps
- View details on a coin or postage stamp
- Thread a needle and sew or do craft projects
