

# TSS 5

The Tiger Software Suite 5 makes it easy to get accurate braille translation in seconds. Insert text and graphics within familiar programs such as Word and Excel and translate with the touch of a button. It's great for users of all skill levels!

With TSS 5 you can now utilize Voiceye, a 2-dimensional barcode that allows individuals to access print information using a smartphone and the free Voiceye application.

Simply by adding a Voiceye code, users can access the text in your documents through 10 levels of magnification and 5 levels of high contrast, and through VoiceOver or Text-To-Speech, all without requiring access to the internet or phone networks. Voiceye can also translate the text into 58 languages using Google Translate.

TSS is optimized for Tiger® braille printers—the latest in braille technology. TSS is available in multiple languages.

\*A free license of TSS is included with the purchase of a ViewPlus Embosser

\*Braille math translation is also available!
